NEW JERSEY AMERICAN WATER

New Jersey American Water – Salem City System has Completed all Remedial Actions and has Resolved the Violation/Situation

Prior to becoming your water service provider on June 25, 2024, the City of Salem Water System violated a drinking water standard for Perfluorononanoic Acid (PFNA) in 2022. New Jersey American Water – Salem City previously notified customers through the annual PFNA Maximum Contaminant Level (MCL) exceedance notification letter on July 16, 2025, and provided the most recent second quarter update on its website on April, 15, 2026.

NJ American Water – Salem City has completed the installation of six (6) granular activated carbon (GAC) filters for PFAS removal at the Salem Water Treatment Plant (TP002009) and began operation of the Treatment Plant as of May 18, 2026.

A sample collected on May 21, 2026, demonstrates that the water provided by New Jersey American Water – Salem City water system is below the detectable limit of 2 parts per trillion (ppt) for PFNA, and is in compliance with the PFNA MCL.

New Jersey American Water – Salem City will continue to sample for PFNA on a quarterly basis, and results will be reported in the annual Consumer Confidence Report distributed to all customers.

This notice is our final notification regarding this violation to help ensure our consumers are aware that the water being provided is in compliance with the PFNA MCL.

For more information, please contact New Jersey American Water at 1-800-272-1325 or NJWaterQuality@amwater.com.
